## *Rez (Bassnectar Remix)* Underworld

Remix of seminal dance track coming  
February 12<sup>th</sup> on Om Records / Child's Play

Having been one of the original bass music practitioners, it makes a lot of sense for **Bassnectar** AKA Lorin Ashton to team up with dance music legends **Underworld** on their classic track "REZ". On **February 12th**, **OM Records** imprint **Child's Play** will release Bassnectar's remix of the cut, first put out by the seminal EDM group 20 years ago. "REZ" has had a special place in Ashton's heart for well over a decade as a memorable part of his early exposure to dance & music. "By the time I first heard 'REZ'...it was already a classic. It was the third 'rave' I had ever been to," says Ashton, "That was the only song I remembered from the entire night. And for years to come, whenever I hear any version or remix or even a slight fragment of that shimmering resonant arpeggiator I get flashbacks."

The Bassnectar remix adds mounds of thunderous bass to the track while still retaining its delicate and distinctive arpeggiated melody. The single will be released on 180-gram vinyl with digital download, full color jacket sleeve and liner notes from Bassnectar
